DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Ohkawa et al. (4,665,412).

3. Re claim 11, Ohkawa et al. disclose a substrate with a multilayer structure, the multilayer structure including a quantum well structure having a semiconductor layer (108) sandwiched by further layers of an electrical insulating material (104), wherein the semiconductor layer is enclosed by high-k materials with different dielectric constants (Col. 3, lines 28-33 and Col. 10, lines 10-17).

Allowable Subject Matter

4. Claims 1-5, 8-10, 12, 13 and 23 are allowed.

Response to Arguments

5. Applicant's arguments filed 10/28/08 have been fully considered but they are not persuasive. Applicant argues that none of the cited portions indicate that the example layers include different high-k materials used to enclose a single semiconductor layer.

Art Unit: 2823

However, in Col. 2 lines 64-66 Ohkawa et al. disclose that the conductive layer 104 could be a semiconductor layer. Semiconductor layer 104 is sandwiched between dielectric layers 106 and 108 (Fig. 1, left side). In Col. 13, lines 45-48, Ohkawa et al. disclose that “more than two different types of conductive layers of different energy level spacing may be interleaved to increase or restrict the bandgap to energy levels mutually shared by the multiple, different layers”, thus different insulating layers compatible with each conductive layer would be used in between.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
